Implementing ERP for Nonprofits

The Resource Group helps nonprofit organizations implement Intacct cloud financial software so they can stay focused on their number one priority, their mission. Intacct gives nonprofits a powerful financial management solution that includes fund accounting, grant management, program management, project management and the necessary compliant reporting requirements.

Support and Services

We've been helping nonprofits implement ERP solutions since 1988, and are committed to making sure your organization has the level of support you need by offering implementation, training, help desk, integration and customization services.
